Berlin, Germany | Mexican & Spanish EU citizen

SUMMARY

Frontend engineer based in Berlin, focused on React and TypeScript applications. I turn complex requirements and API data into interfaces that are easy to understand and use. My work covers component design, SSR, browser performance, testing, and release, in close collaboration with product, design, and backend teams.

TECHNICAL SKILLS

Frontend & UI:
React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Material UI, styled-components, responsive UI, component architecture, design systems

Data & Performance:
D3.js, GraphQL, Apollo Client, REST APIs, SSR, lazy loading, routing, state management, browser APIs, performance optimization, technical SEO

Delivery & Quality:
Node.js, PostgreSQL, WebSockets, Cloudflare, Vercel, GitHub Actions, CI/CD, unit and end-to-end testing, debugging, code review, cross-functional collaboration

EXPERIENCE

Independent Web Development

Berlin | Apr 2025 - Present

Independent frontend applications

Built and deployed React and TypeScript applications with responsive interfaces, search and filtering, comparison views, data visualizations, realtime interactions, and PWA/offline support. The work spans REST APIs, WebSockets, browser APIs, data ingestion and normalization, automated refresh pipelines, and CI/CD. Used modern component and styling tools alongside GitHub Actions, Cloudflare, and Vercel for delivery.

Lingoda

Berlin | Jun 2021 - Mar 2025

Software Engineer - Language learning platform

Worked on the student-facing React application for a live online learning platform. For Lingobites, I built exercise types, quizzes, flashcards, session routing, progress tracking, and gamification. I connected these flows to GraphQL through Apollo and worked with product, design, backend, and QA as the feature changed through testing and release.

Quandoo

Berlin | Sep 2017 - Jan 2021

Software Engineer - Restaurant reservation platform

Worked on Quandoo's React booking site, from restaurant discovery and availability filters to reservation and campaign pages. I improved page performance and technical SEO, and built reusable promotional components. I also mapped the application's routing dependencies and helped migrate React Router without breaking its custom SSR and styled-components setup.

Market Logic Software

Berlin | Mar 2016 - Jul 2016

Web Developer - Data visualization UIs

Built React components and D3.js charts for an enterprise market intelligence product. The interfaces turned research data into graphs and interactive widgets that users could explore.

EDUCATION

Bachelor of IT Engineering - Tecnologico de Monterrey, Mexico

Aug 2012 - May 2017

Studied programming, data structures, databases, networks, operating systems, IT security, and cloud computing. Completed a DAAD exchange semester in Informatics at Hochschule Furtwangen, Germany.
