📍 Berlin, Germany

Mexican & Spanish (full EU citizen)

Software engineer with 8+ years of experience in web development, primarily with JavaScript/TypeScript and React. Web development is both my profession and hobby — I'm genuinely passionate about building functional, good-looking applications with solid UX. I keep up with the latest tools and have been actively using AI-assisted development to work more productively, while maintaining good software fundamentals. Always learning, always experimenting.

📁 PROFESSIONAL EXPERIENCE

Lingoda — Software Engineer

Berlin • Jun 2021 – Mar 2025

Worked on a language learning platform at a Berlin startup, building interactive practice features including quizzes and flashcards, developing frontend experiences with **React and TypeScript**, implementing UI with **MaterialUI**, and contributing to **GraphQL state management with Apollo** while collaborating with cross-functional teams and backend services built on **NestJS and PostgreSQL**.

Quandoo — Software Engineer

Berlin • Sep 2017 – Jan 2021

Contributed across multiple teams on a restaurant reservation platform, building advanced **UI components** such as interactive carousels and responsive layouts, implementing **SEO improvements with server-side rendering**, developing scalable features with **React and Redux**, and creating reusable components with **Styled Components** to improve overall user experience.

Market Logic Software — Web Developer

Berlin • Mar 2016 – Jul 2016

Worked on advanced **UI components for data visualization**, creating interactive graphs with **React and D3.js**, developing dynamic widgets for data representation, and focusing on intuitive user interfaces.

AISA — Software Developer

Mexico • Apr 2015 – Jun 2015

Contributed to **legal document management systems** for government institutions, designing and programming UI forms and controls in **Windows Presentation Foundation (WPF)**, developing applications with **C#**, working with large **SQL databases**, and collaborating on institution-wide management systems.

🎓 EDUCATION

Bachelor of IT Engineering

Aug 2012 – May 2017

Tecnológico de Monterrey, Mexico

Comprehensive studies covering **Object-Oriented Programming**, **Data Structures**, Databases, Networks, Servers and Operating Systems, **IT Security**, and **Cloud Computing**.

CORE COMPETENCIES

- Routing and State Management
 - API Design
 - Responsive Design & UX/UI
 - AI-Assisted Development
 - Unit Testing & CI/CD
 - Code Quality & Code Reviews
 - Performance Optimization
 - Server-Side Rendering (SSR)
- Debugging and Troubleshooting
 - Code Splitting and Lazy Loading
 - Web Vitals and Lighthouse
 - SEO Optimization
 - Client-Server Interaction
 - Documentation
 - Cross-Functional Team Collaboration
 - Agile Methodology
