📍 Berlin, Germany | Mexican & Spanish EU citizen

SUMMARY

Product-minded software engineer with 8+ years of professional experience building user-facing web applications, especially UI systems, onboarding flows, forms, interactive components, and polished product UX. Strong professional foundation in React, TypeScript, JavaScript, and modern web UI, with the fundamentals to adapt across adjacent frontend stacks. Strongest in hands-on product engineering roles where UI quality, maintainable code, and practical full-stack ownership matter. Experienced with independent full-stack app delivery and AI-assisted development workflows across research, prototyping, implementation, debugging, deployment, and iteration.

EXPERIENCE

Independent Product Development

Berlin | Apr 2025 - Present

Web apps, product UX, and AI-assisted delivery workflows

Built and shipped independent web applications with modern JavaScript/TypeScript tooling and AI-assisted development workflows. Focused on polished product UX, search/comparison interfaces, realtime interactions, PWA behavior, deployment, and iteration. Developed a practical AI-assisted delivery workflow combining research, structured decision-making, prototyping, vertical-slice implementation, manual review, deployment, and maintenance.

Lingoda

Berlin | Jun 2021 - Mar 2025

Software Engineer - Language learning platform

Built user-facing product features for a production learning platform, with a strong focus on React/TypeScript UI quality, student-facing practice flows, quizzes, flashcards, reusable components, Material UI implementation, GraphQL/Apollo state management, and collaboration with product, design, and backend teams.

Quandoo

Berlin | Sep 2017 - Jan 2021

Software Engineer - Restaurant reservation marketplace

Contributed to a consumer-facing marketplace across responsive booking and discovery interfaces. Built reusable React/Redux UI components, interactive carousels, server-rendered pages, SEO improvements, and frontend features that supported restaurant search, reservation, and marketplace browsing workflows.

Market Logic Software

Berlin | Mar 2016 - Jul 2016

Web Developer - Data visualization UIs

Worked on advanced UI components for data visualization, creating interactive graphs and dynamic widgets with React and D3.js for data-heavy product surfaces.

AISA

Mexico | Apr 2015 - Jun 2015

Software Developer - Government document systems

Built UI forms and controls for legal document management systems using C#, WPF, and SQL databases, collaborating on institution-wide internal software.

EDUCATION

Bachelor of IT Engineering

Aug 2012 - May 2017

Tecnologico de Monterrey, Mexico

Studies covered object-oriented programming, data structures, databases, networks, servers and operating systems, IT security, and cloud computing.

» TECHNICAL SKILLS

Product UI Engineering:

JavaScript, TypeScript, React, UI architecture, forms, onboarding flows, responsive interfaces, design systems

Full-Stack Product Delivery:

Node.js, REST/GraphQL APIs, PostgreSQL, Redis, WebSockets, PWA/offline behavior

AI-Assisted Development:

LLM/AI SDKs, coding agents, reusable agent skills, MCP workflows, research/prototyping/implementation loops

Quality & Release:

Playwright, debugging, code review, GitHub Actions, Docker, deployment, CI/CD

≡ PRODUCT ENGINEERING STRENGTHS

- Building polished user-facing product surfaces with maintainable JavaScript/TypeScript code and modern UI architecture.
- Designing UI systems, forms, onboarding flows, responsive interfaces, and interactive components.
- Owning practical full-stack product slices across frontend, APIs, data, deployment, and iteration.
- Using AI-assisted workflows for research, prototyping, implementation, debugging, and review while staying accountable for architecture, UX, and code quality.
- Collaborating with product, design, backend, and cross-functional teams in startup/product environments.

▣ SELECTED INDEPENDENT WORK

OV Berlin

[ovberlin.site](#)

Public PWA for finding original-version cinema screenings in Berlin, with automated data refresh, rating/trailer enrichment, offline support, maps, and fast search/filter UX. Built and deployed end to end.

Flyscan

[flyscan.site](#)

Flight comparison interface that aggregates multiple providers into a filterable itinerary view, with emphasis on search UX, loading states, result comparison, and deployment.

SnapQuiz

[snapquiz.fun](#)

Realtime group quiz app with TV and mobile flows, AI-generated questions, voice/tap answering, and multiplayer room coordination.

RankZap

[rankzap.site](#)

Realtime ranked-voting product with mobile-first drag-and-drop ranking, live tallies, multiple voting modes, presence, validation, and WebSocket updates.
