📍 Berlin, Germany | Mexican & Spanish EU citizen

SUMMARY

Software engineer with 8+ years of professional experience building user-facing web applications, reusable UI components, interactive workflows, and production features. Strong foundation in React, TypeScript, JavaScript, and modern web development, with practical full-stack experience across APIs, data, deployment, and iteration. Comfortable working with product, design, backend, QA, and cross-functional teams.

TECHNICAL SKILLS

Core Engineering:

JavaScript, TypeScript, React, UI architecture, reusable components, state management, responsive web apps, CSS

Backend & Data:

Node.js, REST/GraphQL APIs, PostgreSQL, WebSockets, scraping/enrichment pipelines, integrations

Quality & Delivery:

Playwright, debugging, code review, GitHub Actions, Docker, deployment, CI/CD

AI-Assisted Development:

LLM/AI SDKs, coding agents, MCP workflows, research/prototyping/implementation loops

EXPERIENCE

Independent Web Applications

Berlin | Apr 2025 - Present

Web apps, UX, and AI-assisted delivery workflows

Stayed hands-on with React/TypeScript product work through independent web applications and prototypes. Built polished UI, search/filter and comparison flows, realtime interactions, PWA/offline behavior, data pipelines, deployment automation, debugging, and iteration while adopting AI-assisted development workflows. Used this period to explore modern web tooling, full-stack delivery patterns, and practical AI-assisted engineering while keeping ownership of architecture and final behavior.

Lingoda

Berlin | Jun 2021 - Mar 2025

Software Engineer - Language learning platform

Built user-facing features for a live online language learning platform. Had major frontend ownership of Lingobites student-facing exercise flows, including interactive UI, multiple exercise types, routing, animations, state handling, progress tracking, gamification, and flashcard integration. Helped replace a constrained third-party quiz system with an in-house experience, working with React, Apollo/GraphQL, Material UI, product, design, backend, QA, bug fixing, and release iteration.

Quandoo

Berlin | Sep 2017 - Jan 2021

Software Engineer - Restaurant reservation platform

Built and improved the consumer restaurant booking site across search, discovery, reservation, promotional, SEO, and performance surfaces. Led investigation and planning for a major React Router migration, mapping dependencies, comparing options, documenting tradeoffs, and helping preserve custom SSR and styled-components behavior while unblocking React/library upgrades. Also worked on metadata, canonicals, internal linking, indexability, availability filters, and time-to-first-paint/time-to-interactive improvements.

Market Logic Software

Berlin | Mar 2016 - Jul 2016

Web Developer - Data visualization UIs

Built data-heavy UI components, interactive graphs, and dynamic widgets with React and D3.js for an enterprise market intelligence platform. Worked on interfaces that translated research and insight data into usable visual product surfaces.

AISA

Mexico | Apr 2015 - Jun 2015

Software Developer - Government document systems

Built UI forms and controls for legal document management systems using C#, WPF, and SQL databases. Contributed to internal software for capturing, validating, and managing structured document data in government workflows.

EDUCATION

Bachelor of IT Engineering - Tecnologico de Monterrey, Mexico

Aug 2012 - May 2017
